

InMotion Global Chosen as Finalist for IT Florida Technology Award

Florida's leading Transportation Management System honored in Government Technology category

Saint Petersburg, Florida – November 9, 2009

InMotion Global's Transportation Management System, InMotion Global TMS™, has been honored with industry recognition once again. Its most recent accolade comes from [IT Florida](#), a statewide organization focused on developing policies and practices that enable Florida technology companies to remain global industry leaders.

InMotion Global was recently selected by *Inbound Logistics* Magazine as a 2009 Top 100 Logistics IT Provider. The IT Florida recognition acknowledges InMotion Global's work for the state of Florida and its contributions to the Florida Department of Emergency Management relief efforts. InMotion Global TMS™ was developed to provide transportation management to shippers with complex logistics requirements who need total asset visibility. The TMS specializes in moving time-sensitive freight and rapid deployment. Because the system was designed using .NET remoting and .NET web services, it is capable of integrating multiple facilities with any number of users. This complex design structure also gives the system the flexibility and versatility required to handle intricate resource creation and advanced tracking capabilities.

InMotion Global TMS™ offers Integrated Voice Response and Web portals, giving shippers and carriers access to load, order, pick up and delivery information remotely from any web-enabled device, including cell phones. Its streamlined, low-bandwidth portals tie directly into an enterprise data center, so that current production data is available anywhere, anytime. This allows end-users to monitor the current disposition and location of freight, and ensures timely delivery and accurate, real-time reporting.

IT Florida's acknowledgement of InMotion Global TMS™ and its powerful management and tracking capabilities reinforces the fact that the system's developers have created the most robust Transportation Management System in the industry. The company is proud of its industry recognition and is even more pleased to be a part of Florida's Emergency Response team.

About InMotion Global, Inc.

InMotion Global, Inc. provides the industry-leading and patent-pending Transportation Management System, Ascend TMS™ with its companion web-based load tracking portal LoadLink™ to thousands of shippers, 3PL's and asset carriers in 19 different countries across the United States.
